Omogenizzatori ed Emulsionatori > Emulsionatori | Homogeneiser and Emulsifiers > Emulsifiers

## EMULSIONATORE VERTICALE F400

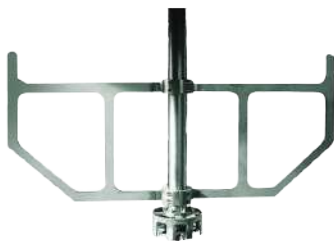

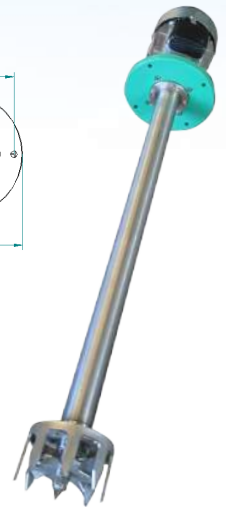

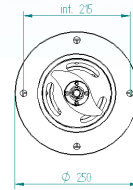

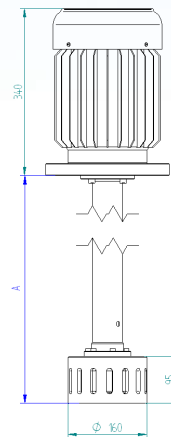

## VERTICAL EMULSIFIER F400

L'emulsionatore verticale è idoneo per miscelare e disperdere diversi liquidi o polveri in liquidi, all'interno di vasche e cisterne.

L'ottimizzazione della miscela è garantita dall'effetto rotore / statore. L'elica è disegnata per ottenere il miglior rendimento ai minimi consumi, mentre lo statore permette elevate rese di dispersione.

The vertical emulsifier is suitable for mixing and dispersing various liquids or powders in liquids, inside tanks and cisterns.

The optimization of the mixture is guaranteed by the rotor / stator effect. The propeller is designed to obtain the best return for minimum consumption, while the stator permits high dispersion returns.

### Varianti Prodotto - Product Variants

Tipo - Type	Effetto - Effects	A	KW
F400.6	standard for any liquid	600	4
F400.8	standard for any liquid	800	4
F400.11	standard for any liquid	1100	4
F400.6.R	dense liquids	600	4
F400.8.R	dense liquids	800	4
F400.11.R	dense liquids	1100	4
F400.6.CX	COWLESS mixer	600	4
F400.8.CX	COWLESS mixer	800	4
F400.11.CX	COWLESS mixer	1100	4
F400.6	simple mixer	600	4
